

School Safety and Security is the most vital aspect to protecting our future generation.

CSI not only provides professional security but has also conducted multiple investigations defending schools in civil litigation. Our management has been qualified as experts in court and have taken part in numerous cases. One such case, Saylor vs. Hollidaysburg School District, CSI members served as an expert witness in defense of the school resulting in a summary judgement in the favor of the school's Resource Officer and their use of search and seizure.

THE CSI SCHOOL ADVANTAGE.

CSI is full service professional investigation and security company that has worked closely with schools across the Commonwealth since 1998. CSI's team of experts can bring a holistic approach to the safety and security of your schools' program.

CSI'S PA ACT 67 SCHOOL SECURITY PERSONNEL TRAINING. THE RIGHT FIT FOR YOUR SCHOOL.

We offer state approved school security personnel training for all security personnel including School Police Officers, School Resource Officers, and School Security Guards. Since the inception of PA Act 67 of 2019, all school security personnel are required to go through 40 hours of approved training prior to serving in a security function.

CSI has trained over 20,000 security officers in various disciplines. Our instructors are subject matter experts that have worked in Commonwealth Schools and make the material relevant to what your school security will face on a day-to-day basis. The delivery of our training is flexible and can be tailored to fit your needs. Training is offered both online in a hybrid format and in person.

THE CSI SCHOOL SAFETY AND SECURITY ASSESSMENT.

PA Act of 2018 requires schools to complete a safety and security assessment. Furthermore, there is a mandate for schools to have a committee review it every three years and make revisions as necessary. CSI is one of the few organizations in Pennsylvania that is trained and has registered analysts that are able to complete the physical and behavioral assessment requirement. We have been expertly conducting assessments since 2001.

If you have had an assessment done, let our experts review your current plan to ensure polices are being followed and recommendations have been implemented using a "fresh eyes approach". Our analysts attend continuous trainings keeping up with the latest technology and safety innovations and maybe able to enhance what you already have in place.

PROFESSIONAL UNIFORMED SECURITY, EXPERTLY MANAGED.

Our staff includes professional armed and unarmed School Security Guards for security functions on campus or after school events. All of our Security Guards meet the vigorous standards as an SSG as well as additional trainings in safety, security, and de-escalation techniques.

TALK TO AN EXPERT SECURITY ANALYST

Since 1998, CSI has worked with Fortune 500 companies, government facilities, schools and universities, as well as high-asset individual residences
